

[NAME OF DOCUMENT]

ABSTRACT

[SUMMARY]

[PROBLEMS TO BE SOLVED] An object of the invention is to provide an organic electroluminescent element with high luminance and long half life and a display employing the organic EL element.

[MEANS TO SOLVE THE PROBLEMS] An organic electroluminescent element comprising a component layer including at least one light emission layer capable of emitting phosphorescence, wherein the component layer contains at least one specific carbazole derivative.
